Total Commander will generate a directory listing of all directories stored on current drive. You can quickly navigate to select directory with double click, quick search in a directory structure, or print structure on a printer. You can also export it to PDF with virtual PDF printer driver.

Directory Tree in Total Commander

Total Commander stores generated directory listing in a file called **treeinfo.wc** located in the root of a drive. It is saved in a simple text format and can be viewed and edited in a text editor.
